EDUCATION

The University of Central Florida | Orlando, FL | Graduated - May 2026
Master of Science (MS) – Financial Technology (FinTech)
GPA: 3.95 / 4.0

The University of Central Florida | Orlando, FL | Graduated - May 2024
Bachelor of Science (BS) - Computer Science
Relevant Coursework (MS + BS): Cyber Defense Analysis, Number Theory, Discrete Structures II, Stats & Prob for CS, Data Structures, Multivariable Calculus, Linear Algebra, Computer Architecture, Algorithm Techniques, Operating Systems, Database Management, Contest Problem Solving, Systems Software, Machine Learning Algorithms.

Certificates: Testout CyberDefense Pro | AWS CCP | CompTIA A+ , Network+, Security+ | FINRA SIE

WORK & LEADERSHIP EXPERIENCE

Magisterium AI (Longbeard) - USA - Remote
Software Engineer, June 2025 – August 2026

- Designed and shipped an analytics microservice in Python/Typescript translating natural-language questions into SQL queries over thousands of records on DuckDB, returning charts on-demand in sub 5 seconds on average. Owned it end-to-end from design through deployment. Drove MRR up 30% within 1 month from deploying this feature.

- Built a complete end-to-end document viewer with per page AI contextual chat capabilities and AI audio generation and streaming with multi-layer audio caching on those documents.

- Pushed several features and internal tools, including but not limited to: WhatsApp chatbot integration via Twilio, a custom visualization engine to display an interactive map of vector chunks in 3D space from our library, Temporary Chat, and SLM integration. Using Zilliz, Supabase, and GCP while deploying on Vercel and Railway.

Arkhaios - UCF - Orlando, FL
Project Manager / Fullstack, July 2023 – April 2024

- Conceptualized, designed, and engineered a trading platform with a fund management networking system within a team of 4 for our year long computer science senior design project.

- Worked with Alpaca & Plaid APIs along with: NextJS, NodeJS, ReactJS, Rust, WebSockets, ExpressJS, MongoDB, QuestDB, Docker, Redis, Jira, AWS EC2 & MSK (Kafka), and Postman.

- Collaboratively led the design of over 50+ RESTful APIs. Designed and coded over 90% of all UI/UX including all hooks & components. Built a full friend-chat feature w/ pagination. Optimized most APIs using Redis.

LinkedIn - Sunnyvale, California, USA
Software Engineering Intern, May 2022 – August 2022
- Worked on the payments team to update a One-Time Payment system for Enterprise customers using the Adyen API and internal tools. Used Java, Ember.js and made a lot of sequence diagrams.

GDSC Competitive Programming FIU - Miami, FL
Tech Lead, December 2021 – April 2022

- Mentored students transitioning into competitive programming by teaching data structures and algorithms, emphasizing problem-solving skills and pattern recognition to apply techniques across a wide range of problems.

- Wrote solutions for Codeforces and leetcode problems in python and java, live, for an audience of about 5-10 students.

UPE SPARK DEV FIU - Miami, FL
Leader, Aug 2021 – December 2021

- Conceptualized, designed, and managed a team to engineer a hotel kiosk fast check in/out system that used fingerprints to replace physical magnetic cards. Worked with XCode/MongoDB/Raspberry Pi. Funded by FIU.
